EDUCATION

Iskenderun Technical University

2020 - 2025

Computer Engineering

- **Vice President**, ISTE Cyber Club (2023–2024)
- **Focus**: Offensive Cybersecurity, Networking, and System Defense
- **Relevant Certifications**: Cisco CyberOps Associate, CCNAv7, ISO 27001, Turkcell Pentesting, ICCW, Cyber Security Training, Certified Cybersecurity Foundations, CAPT.

SKILLS

- **SIEM**: Splunk, IBM QRadar, Wazuh
- **Kali Linux Tools**: BurpSuite, Searchsploit, Nmap, Metasploit, Nikto
- **Vulnerability Analysis:** Nessus, Qualys, OpenVAS
- **FIREWALL**: FortiGate, Pfsense
- **NETWORK**: TCP/IP, OSI Layers, LAN, DNS, TCP/UDP, VPN, Wireshark, Whois, URLVoid, Phishing Analysis, Authentication
- **SOC Experience**: Log Analysis, Detection Packet Analysis, Malware Analysis, Online Sandbox

INTRODUCTION

I am a Computer Engineering graduate from Iskenderun Technical University with hands-on experience in SOC operations, including SIEM management (Splunk, QRadar), firewall configuration (FortiGate, Pfsense), and vulnerability assessment (Nessus, Qualys). Skilled in log analysis, threat detection, packet inspection, and malware investigation. Passionate about Red Teaming and committed to continuously developing both offensive and defensive cybersecurity skills. I am detail-oriented, collaborative, and dedicated to completing every task with professionalism and precision.

WORK EXPERIENCE

SOC Intern — 2025 - 2025

ION Bilgi Teknolojileri I Ankara

- Successfully deployed Wazuh SIEM/HIDS on Linux, Windows, and Windows Server platforms for SOC operations.
- Improved and added custom rules and alerts to enhance threat detection capabilities in Wazuh.
- Installed and integrated Suricata (IDS) with Wazuh for centralized log management on Windows systems.
- Created a detailed report to simplify Suricata installation and Wazuh integration processes.
- Configured Wazuh for SQL injection detection and file integrity monitoring.

Intern — 2023 - 2024

BgTek Cyber Security I Bursa

- Developed a C++ program to identify specific number patterns within random sequences.
- Built a simple “Grocery Store System” using Object-Oriented Programming principles in Java.
- Installed FreeRADIUS on Kali Linux and integrated it with MySQL for centralized authentication management.
- Discovered and reported a critical “Admin NoPass” SQL vulnerability in the DIWA system during penetration testing, including remediation suggestions.
- Installed and configured pfSense firewall for network segmentation and managed network connections with Ubuntu Server integration.
- Compiled and added a new interface for pfSense using Ubuntu Server.
