EDUCATION

Iskenderun Technical University

Computer Engineering 2020 - 2025

- **Vice President**, ISTE Cyber Club (2023–2024)
- **Focus**: Offensive Cybersecurity, Networking and System Defense
- **Certifications**: Cisco CyberOps Associate, CCNAv7, ISO 27001, Turkcell Pentesting, ICCW, Cyber Security Training, English B1 Certificate, Certified Cybersecurity Foundations, CAPT.

SKILLS

- **Offensive Security**: Burp Suite, Nmap, Metasploit, Searchsploit, Nikto, Kali Linux
- **Vulnerability Analysis**: Nessus, Qualys, OpenVAS
- **SIEM**: Splunk, IBM QRadar, Wazuh
- **Firewall / IDS**: FortiGate, pfSense, Suricata
- **Networking**: TCP/IP, OSI Layers, LAN, DNS, TCP/UDP, VPN, Wireshark, Whois, URLVoid, Phishing Analysis, Authentication
- **SOC Experience**: Log Analysis, Detection, Packet Analysis, Malware Analysis, Online Sandbox
- **Programming**: Python, C++, Java

SUMMARY

I am a Computer Engineering graduate from Iskenderun Technical University. Most recently, I completed a Penetration Testing internship at Nesil Teknoloji, where I supported the team in web application and network penetration testing engagements and gained hands-on experience in reconnaissance, vulnerability validation and reporting.

My previous SOC experience with SIEM management (Wazuh, Splunk, QRadar), IDS integration and log analysis allows me to evaluate attack scenarios from the defender's perspective as well. I aim to specialize in Red Teaming. I am detail-oriented, collaborative and not afraid to take ownership of my work.

EXPERIENCE

Penetration Testing Intern 2026

Nesil Teknoloji | Ankara

- Took part in OWASP Top 10 focused web application penetration tests as part of the team.
- Worked on the reconnaissance and vulnerability validation phases of network penetration tests (Nmap, Burp Suite, Metasploit, Nessus).
- Contributed to CVSS-based scoring of findings and to test reports including remediation recommendations.
- Participated in post-remediation verification (retest) activities.

SOC Intern 2025

ION Bilgi Teknolojileri | Ankara

- Deployed Wazuh SIEM on Linux, Windows and Windows Server platforms for SOC operations.
- Designed and implemented custom rules and alerts to enhance threat detection capabilities in Wazuh.
- Installed Suricata (IDS) on Windows systems, integrated it with Wazuh, and wrote a detailed technical report on the process.
- Optimized Wazuh configuration for SQL injection detection and file integrity monitoring (FIM).

Intern 2023 - 2024

BgTek Cyber Security | Bursa

- Discovered and reported a critical "Admin NoPass" SQL vulnerability in the DIWA system during penetration testing, including remediation suggestions.
- Installed FreeRADIUS on Kali Linux and integrated it with MySQL for centralized authentication.
- Set up a pfSense firewall with Ubuntu Server for network segmentation, and compiled and integrated a new network interface for pfSense.
- Developed a C++ program to detect patterns in random number sequences.
